Allstate Insurance Company seeks an **Associate Predictive Modeler** for **Northbrook, IL**.

The Allstate Corporation is the nation's largest publicly held personal lines insurer. A Fortune 100 company, with \$156 billion in assets, Allstate sells 13 major lines of insurance, including auto, property, life and commercial. Allstate is widely known through the "You're in Good Hands With Allstate" slogan. Allstate was founded in 1931 and became a publicly traded company in 1993.

The purpose of this department is

to apply economic, quantitative, statistical, and actuarial skills in the development of new pricing and financial models which contribute to Allstate's growth and profitability. We communicate this work to other departments and support implementation. This collaborative relationship helps Allstate win in an ever-changing and highly competitive marketplace

The scope of this job is

to apply economic modeling and quantitative skills to contribute directly to new pricing and financial model development. Obtain, analyze and translate data into useful business information for development of new products and services, as well as competitive product pricing strategies.

The position will be responsible for

- Identifying drivers of insurance costs and estimating the expected losses for classes of risks using advanced statistical techniques.
- Assist decision makers with studies that evaluate new business models for customer retention and growth initiatives as well as estimate the future value of customer segments.
- Estimating the economic impact of new pricing strategies, operational decisions and proposed legislation.
- Acting as an analytical consultant for other operational departments such as Pricing, Marketing, Finance and Risk Management.
- Communicate findings and recommendations to senior level management from across different departments.
