

COMPANY NAME:

Prudential

JOB TITLE:

Manager, Actuarial

DESCRIPTION/RESPONSIBILITIES:

Financial/Technical Support, P&SS Pricing

The Pension Risk Transfer markets present significant growth opportunities for Prudential Retirement. Prudential has established leadership positions in these markets, and is poised for additional growth and strategic investment in these businesses. To support this business growth, the P&SS Finance organization has created a new Financial/Technical Support position. The new position will be responsible for working with product development professionals that are customizing transactions to meet specific client objectives in a culture of innovation and collaboration. This position will work closely with the business team to provide a solid interface between finance, actuarial, investment ops, derivative ops, ALM and others as needed to monitor, manage and execute the post-closing requirements of innovative transactions (examples of monitoring, management and execution include confirming/calculating collateral, monitoring collateral requirements and adherence to those requirements, confirming ongoing payments of benefits, premiums or fees, assisting in data reviews, updates and best estimate changes, reconciling cash-flows, etc.).

Primary job responsibilities include:

- \* Developing models as needed to monitor and manage the post-closing requirements of innovative transactions.
- \* Ensuring model review is appropriately carried out on all interim models needed to monitor and manage the post-closing requirements of innovative transactions,
  - \* Assisting in design and spec for installed systems designed to manage the transactions on an ongoing basis.
  - \* Assisting in the acceptance testing of the installed systems needed to manage the transactions on an ongoing basis.
  - \* Communicating transaction specific information to all partners, as needed, across CoEs.
  - \* Performing calculations and reconciliations in support of in-force Pension Risk Transfer products.

REQUIRED SKILLS:

Qualifications & Experience

- \* 3 to 5 years of financial experience.
- \* Experience with Mortality Tables, cashflow creation and financial forecasting and modeling.
- \* Strong Excel skills.
- \* Good communication skills.
- \* Ability to manage multiple priorities and deliverables
- \* Experience in maintaining a controlled environment and protecting sensitive information
- \* Comfortable working independently on large analytical projects
