

COMPANY NAME:

Prudential

JOB TITLE:

Process Mgmt Specialist

DESCRIPTION/RESPONSIBILITIES:

The individual will be part of the Capital Markets Group of Prudential Annuities, which is responsible for the day to day management and oversight of Prudential's variable annuity hedging program. The group owns the analysis of key asset and liability risk measures and decision making relative to the hedging of these risks.

The candidate will report directly to the Vice President of Quantitative Methods. As part of the Annuity Hedging team, the candidate will help coordinate model development and vetting projects, and manage the respective interactions between the multiple groups involved.

Responsibilities

- Understanding and ability to communicate current processes, specs, and business requirements
- Maintain relevant documentation and support audit requirements
- Manage multiple model development and testing projects

REQUIRED SKILLS:

- 4+ years of leading people and/or project management
- Must be able to prioritize and manage multiple deliverables with limited oversight
- Strong communication and presentation skills
- Strong analytical, problem solving, organizational, and documentation skills
- Creative problem solver
- Must possess the ability to work in a dynamic, fast-paced environment.
- Familiarity with actuarial concepts and/or completion of some actuarial exams is preferred but not required
- Prior experience within IT or any kind of modeling environment is preferred
- Knowledge of capital market instruments (options, swaps, futures, etc.) preferred but not required

Other Comments:

This position requires an individual with both, technical, and project management skills, who is able to work on complex multiple projects and ensure on-time delivery.
